**ICONS:** A coloured page or an hourglass will display if there are unviewed/unsigned off/pending pathology results in the list of results using Reports, Requests or Episodes view types.

- If Status has exceeded the configured 'overdue' time the icons appear as **flashing** and will remain **flashing** until they are signed off

This function enables Clinicians to 'sign off' results have been viewed. This action changes the icon colour.

This function enables Notes to be added to the report being viewed. These notes are audited.

The Transfusion button displays when the patient has crossmatch or products assigned.

Unit No	Product	Group	Status
8777777	RCC SAGM IRR	O NEG	Compatible

Select Transfusion to display the Transfusion History screen and access buttons for Product Availability screen and Antibody Register screen.

**Back** Use the Back button to return to the previous screen

**Next Unsigned Report**

This function enables Clinicians to view the next result that has not been signed off.

Select Favourites for the drop down menu options to display.
